

IMPORTANT CLINICAL NOTICE: This AI-generated screening report provides assistive diagnostic recommendations based on deep learning analysis (EfficientNetB0 & OraVisionAI YOLO). It does NOT constitute a definitive medical diagnosis and must be evaluated by a licensed dental professional.

1. PATIENT & SCREENING INFORMATION

Patient Name:	Demo Patient	Screening ID:	550e8400-e29b-41d4...
Date of Birth:	Not Recorded	Total Images:	1
Gender:	Not Specified	Report Title:	Synthetic Demo — Oral Health AI Screening Report
Patient Notes:	Mild painless mucosal swelling on lower left lip for 2 weeks.		

2. AI CLASSIFICATION FINDINGS

AI Predicted Finding:	MUCOCELE	Model Confidence:	80.0%
Classifier Backbone:	OravisionAI_7Teeth_EfficientNetB0 (v1.0)	Inference Latency:	3234 ms

Class Index	Condition Name	Code	Probability Score	Confidence Bar
0	Canker Sore	CaS	0.00%	
1	Cold Sore	CoS	0.00%	
2	Gum Disease	Gum	0.03%	
3	Mucocele	MC	79.96%	
4	Oral Cancer	OC	2.29%	
5	Oral Lichen Planus	OLP	16.86%	
6	Oral Thrush	OT	0.85%	

3. SPATIAL LESION DETECTIONS (OraVisionAI YOLO)

No discrete spatial bounding boxes detected by YOLO model.

4. EXPLAINABLE AI (XAI) VISUALIZATION SUMMARY

Method	User-Facing Role	Target Layer	Storage Artifact Reference
Occlusion Sensitivity	PRIMARY	N/A	occlusion_sensitivity-overlay.png...

5. MULTI-FACTOR RISK ASSESSMENT

Triage Risk Level:	LOW	Risk Score:	25.0 / 100
Triage Recommendation:	Routine oral health follow-up. Maintain regular bi-annual dental check-ups. Re-evaluate if oral sores persist beyond 10–14 days, increase in size, or become symptomatic.		

6. LICENSED DENTIST CLINICAL ASSESSMENT

Clinical Observations:	Synthetic demonstration: circumscribed mucosal swelling; oral image and AI evidence reviewed.
Diagnosis Notes:	Preliminary assessment documented separately from AI output. In-person examination required for confirmation.
Treatment Plan:	Arrange an in-person dental review. Follow-up and any referral depend on the clinical examination.
Specialist Referral:	None Required
